

Jennifer Andrashko, MSW, LGSW

Project: To explore the work of equine assisted psychotherapy and begin a larger, collective conversation among service providers and stakeholders as it relates to program development, evaluation, and sustainability

Denise Hauge, Graduate Student, Department of Food Science and Nutrition

Project: To develop support for an online database of grain researchers for the purpose of increasing the ability to collaborate on projects that may impact public health and obtain an endowment for the Grains for Health Foundation to support the EDIT (Executive Director In-Training) Internship position.

Amanda E. Matzek, MS, doctoral student Family Social Science

Project: To develop a program to help families make later life decisions for family members, specifically with regard to long term care issues.

Bridget McClatchey, Master's student in Food Science and Nutrition

Project: *Stepping Into Good Health* - to teach young children and adolescents the benefits of a healthy lifestyle, by providing information about nutrition, food, exercise, and an overall balanced lifestyle, as well as helping them to incorporate this information into their actual lifestyles one step at a time.

Shuling Peng, doctoral student Family Social Science

Project: To promote parent-adolescent engagement through team-building activities and discussions in Chinese immigrant families.

Virajita Singh, Sr. Research Fellow, Center for Sustainable Building Research

Project: To raise funds for MN communities that need resources to conduct a sustainable design planning process for their community.

Paul Snyder, MSW, MDiv, Program Director, Konopka Institute for Best Practices in Adolescent Health, University of Minnesota

Project: To identify innovative methods for sustainability of organizations during times of fiscal restraint, and explore new possibilities for cross-generational and cross-cultural sharing, learning, and relationship building, particularly between youth and elders.

Stephen Streng, Associate ASLA, Research Fellow at the Center for Rural Design

Project: To develop a plan for creating a permanent endowment to fund an International Council on Rural Design.

Dewey Thorbeck, FAIA, FAAR, professor and director of Center for Rural Design

Project: To become informed about philanthropy and a way to assist in the establishment and development of an International Council on Rural Design
